## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.
 121:

- Claims 1-10 and 18-22, drawn to a process of making, classified in class 438, subclass 455.
- II. Claims 11-1 and 23-25, drawn to a product, classified in class257, subclass 202.
- III. Claims 26-28, drawn to an apparatus, classified in class 156, subclass 349.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process. For example, the apparatus as claimed is capable of practicing a process, wherein the process does not comprise a step for forming a device layer on a single crystal wafer.
- 3. Inventions I and II are related as process of making and product made.

  The inventions are distinct if either or both of the following can be shown: (1)

Application/Control Number: 10/718,137

Art Unit: 2822

that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process. For example, instead of repeating the forming and cleaving steps, a thick device layer can be formed, and/or the patterning step can be performed after the cleaving step.

Page 3

- 4. Inventions II and III are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product. For example, the apparatus as claimed is capable of making a device, wherein the crystalline pillars are not diodes, but vertical transistors. Furthermore, a product formed by the claimed apparatus does not necessarily include row lines crossing the pillars and column lines crossing the pillars and the row lines.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/718,137 Page 4

Art Unit: 2822

## Species Restriction

6. This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. The invention of Group I (claims 1-10 and 18-22)
  - (A) The species of claims 1-10
  - (B) The species of claims 18-22
- II. The invention of Group II (claims 11-17 and 23-25)
  - (A) The species of claims 11-17
  - (B) The species of claims 23-25

If Applicant elects the invention of Groups I or II, then Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. For example, if Applicant elects the invention of Group I, then Applicant is required to elect between the species of Group IA (claims 1-10) and the species of Group IIB (claims 18-22). Currently, no claim is generic.

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Application/Control Number: 10/718,137

Page 5

Art Unit: 2822

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. See MPEP § 809.02(a).

- 9. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
- 10. A telephone call was made to Phillip Lyren on 20 August 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 11. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
- 12. Applicant is reminded that upon the cancellation of claims to a nonelected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of

Art Unit: 2822

inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toniae M. Thomas whose telephone number is (571) 272-1846. The examiner can normally be reached on Monday-Thursday from 8:30 a.m. to 5:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amir Zarabian can be reached on (571) 272-1852. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
